FOREWORD

This profile of Adult Performance Level (APL) and Adult Competency Education (ACE) projects has been developed as a response to the increasing need for project information, as identified by adult education administrators and program developers throughout the nation. Some 120 current projects are abstracted, giving basic information on project status, activities, products and contacts. Projects described in this document were, for the most part, identified with the assistance of the Adult Education Regional Program Officers and State Directors.

Unless otherwise indicated, projects are supported with Federal funding under the Adult Education Act. Also included are projects funded by the Right to Read, Indian Adult Education and Consumers' Education programs.

Adult and secondary educators who are beginning, or are considering beginning, APL/ACE programs can benefit from the knowledge of projects included in this profile. Second and third year projects may also benefit from communication with other related projects. State Directors of Adult Education and other educational administrators will want to give attention to the potential results of existing projects when determining special funding priorities for the coming year.

An update of this profile is scheduled for Fall, 1977. Criteria for inclusion of projects in the profile include timeliness, attention to meeting functional competency needs of adults and special funding. If you are involved in such a project, please send descriptive information to:
